

Custom Ute Canopy

Project Details

Client	Private
Time Frame	2023
Industry	Retail

Design and manufacture custom Ute canopy including racking, storage, drawers and cabinets.

Our customer requested for us to design and manufacture a customised Ute canopy suitable for a specific set of requirements. We worked closely with the customer to carefully consider all design aspects of the canopy before we began manufacture.

After signing off on the CAD design we manufactured the canopy to the design, assembled and fit the canopy to the Ute for the customer to enjoy.

The end result was a happy customer that has a canopy fit for their specific requirements that is durable and built to last.

- Specific customer requirements
- Working closely with our customer
- Latest hardware
