

Conveyor and Reclaimer Design and Construct

Project Details

Client	Midway
Time Frame	2022
Industry	Forestry

Design, construction and installation of a woodchip reclaim and transfer conveyor system.

Design a suitable solution for storage and transportation of woodchip to existing ship loader infrastructure for loading of bulk carrier. Solution needed to be able to move 1000 ton of product per hour.

- Design criteria - 1000T P/Hr

- Restricted Access.

- Work Area.

- Integration of new system to existing.

- Time frame.

- Product specific properties.

- Environmental impact minimisation.

- 3D CAD Design

- 3D site scanning

- Fabrication

- Advanced manufacturing capability

- Experienced installation experience.
