

Design & Manufacture Custom Tool box

Project Details

Client	Rio Tinto
Time Frame	2023
Industry	Mining

Design and manufacture custom toolbox for our customer to suit a specific requirement.

We worked closely with the end user on the specific features needed for this project and designed a solution. We then manufactured a prototype for field testing. After testing we discussed feedback and finalised the design before manufacturing of the remaining Tool Boxes.

The final product is a quality, long lasting tool box that is efficient and specific to the users needs.

- Specific customer requirements
- Working closely with our customer
- Sourcing of latest hardware options suitable for use

- Design
- CAD
- Sheet Metal
- Laser
- TIG Welding
- Powder Coating
