

Design & fabrication of custom Cellar Door furniture

Project Details

Client	Posh Plonk
Time Frame	July - Nov 2020
Industry	Tourism/Hospitality, Fit-out

Posh Plonk on Main

We engaged CPT to design and build the internal and external fit out for our Restaurant/Cellar Door @ Posh Plonk on Main, Chiltern Victoria. The brief was simple "go as industrial as you like and create private out door spaces that groups of 6-8 guests can enjoy without being on top of other patrons".

What came back was truly amazing, the Pod design Nick and he's team put forward totally met the brief. The Pods have proven to be a huge hit with our guests, are the first to be booked and have featured in many a photo shoot due to their one of a kind nature.

With our indoor/outdoor benches and serveries, the brief was similar "go as industrial as you like and create one of a kind functional pieces".

The X design legs and the I beam concrete filled tops are truly one of a kind and are not only functional, but are all their own work of art.

A stand out is our Cellar Door servery which has a hydraulic draw bridge, which allows us the best use of space.

We cannot recommend CPT highly enough, we were engaged every step of the way and will be recommending and utilising their services in future projects.
